

## CONCRETE BUCKET WITH CENTRAL AND SIDE UNLOADING

We offer our customers our CL series of buckets with reduced height, ideal for batching plants and to be filled with truck mixers. This model presents a **side chute**. This model is manufactured in many different capacities as listed below. We offer also the C series without the side chute, check it in our buckets list! These two models are also available in the galvanized version, that guarantees a long lasting quality thanks to the hot-dip galvanization process that forms a coating of corrosion-resistant zinc which prevents corrosive substances from reaching the more delicate part of the metal.

All our concrete buckets are built to meet or exceed the regulations of CE UNI-EN and ASME and come with the required labels, certificates and user and maintenance manual. All our products are covered by a 1-year warranty (EU Directive).
